

Bladder Volume Scanner.

The ability to move or be moved freely and easily

Experience the Freedom of True Mobility with the First Cordless Bladder Scanner.

Bladder volume range:
0 tot 999 ml

The rise in the number of mobile healthcare workers is creating a need for technology that is compact, easy-to-use, and connects with the mobile devices that drive this new breed of healthcare professionals.

When you think of technology that is easy to travel with two ideas come to mind, smartphones and tablets. What if being able to have the use of a mobility **Bladder Volume Scanner** at your fingertips that is reliable and has high performance in accuracy and as far as capturing images sound?

The convenience of using this smart mobile **Bladder Volume Scanner** to capture a scanned volume is unmistakable. The **Bladder Volume Scanner** is a new generation of bladder scanner that is sure to take "mobility" even further as the number and needs of the mobile healthcare worker begin to shift and increase.

If you can work with your old bladder scanner, then you can scan using **Bladder Volume Scanner**. "You do not need any specific knowledge or training in bladder scanning to use this device. Once the smartphone or tablet is connected wirelessly to the **BVS**, all the rules change for bladder scanning. Mobility is a game changer."

A smart phone or tablet can be connected to the scanner via Wi-Fi scanned images and the calculated bladder volume will be saved in the instrument or send to the phone or tablet. Scanned images can then be shared by the phone's email or memory.

The Bladder Volume Scanner is elegant in its simplicity and versatility.
